

**REACH - declaration for substance of concern in articles**

Declaration Number 1002/2021

Mandík, a.s.

Dobříšská 550

267 24 Hostomice

Czech Republic

**Subject: REACH - declaration for substance of concern in articles**

Starting from January 5, 2021, companies placing articles on the EU market need to provide information to the database on those articles which contain substances of very high concern (SVHC) in a concentration above 0.1% w/w (weight by weight).

SCIP is a database for information on substances of concern in articles as such or in complex objects, products.

The database is meant to provide waste operators with information about hazardous substances in the waste they process so that materials can potentially be recycled and reused in the production of new articles.

Mandík company complies with requirements from applicable legislation, regulations, codes of practice and other quality and environmental requirements applicable to its organization. To secure compliance with REACH and SCIP suppliers of articles are assessed and asked to share information about SVHC.

Many suppliers have certified that the products and/or articles supplied to Mandík company are free from SVHC.

Any products containing an article with SVHC in a concentration above 0.1% w/w will be registered in the SCIP database as soon as enough information is received.

As established under Article 33 of REACH the product recipients will be informed if any article contains more than 0.1% w/w.

Contact our sales or technical representative to get information about the status of the products and/or articles you supply from Mandík company.
